ADDITIONAL INFORMATION SUPPORTING njd (e.g., paragraph 1 site conditions; paragraphs 2-3 rationale used to determine NJD, including information reviewed to assess potential navigation or interstate commerce connections; and paragraph 4 site information on waters of the U.S. occurring onsite):

Review of the 7.5 min. USGS topographic maps, 2003 FSA aerial photos, and NWI all indicate that the basin is isolated and has no connection to waters of the United States. The isolated wetland is located entirely within Douglas County, Minnesota. The subject wetland is isolated and is not adjacent to or part of a tributary system of navigable, interstate, or other waters of the United States. This determination concludes that a interstate or foreign commerce nexus is not present. The subject waterbody is not a waterbody the use, degradation or destruction of which is likely to affect interstate or foreign commerce. The wetland has not been used for recreational purposes. The waterbody is not a water of the U.S. as defined at 33 CFR 328.3 and is not subject to Corps jurisdiction under Section 404 of the Clean Water Act.
